

Dualkote

Dualkote

Applications	Feed rolls for the corrugated container industry
Hardness Available	Dual Durometer Inner Layer: 30 Shore A Outer Layer: 65 Shore A
Color	National blue
Physical Properties	Superior wear and abrasion resistance Excellent cut resistance Excellent coefficient of friction
Chemical Properties	Resistant to organic solvents, water, and petroleum based oils
Features and Advantages	Dualkote is a dual durometer feed roll that is designed to extend feed roll life and reduce board crush. Dualkote's outer layer is designed to outlast conventional polyurethane and rubber feed rolls. Dualkote's inner layer is designed to reduce crush on corrugated board.

Dualkote's excellent wear resistance and reduction of board crush make it the preferred choice for the corrugated industry.
